BILLING CODE 4310-70-P

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before December 21, 1996. Pursuant to section 60.13 of 36 CFR Part 60 written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the National Register, National Park Service, P.O. Box 37127, Washington, D.C. 20013-7127. Written comments should be submitted by January 13, 1997.

Beth Savage,

Acting Keeper of the National Register.

BILLING CODE 4310-70-P

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731-TA-753-756
(Preliminary)]

Cut-to-Length Carbon Steel Plate From China, Russia, South Africa, and Ukraine

Determinations

On the basis of the record¹ developed in the subject investigations, the Commission determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. § 1673b(a)), that there is a reasonable indication that an industry in the United States is threatened with material injury² by reason of imports from China, Russia, South Africa, and Ukraine of cut-to-length carbon steel plate,³ provided for in provisions of headings 7208 through 7212 of the Harmonized Tariff Schedule of the United States (HTS),⁴ that are alleged to be sold in the United States at less than fair value (LTFV).

Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission's rules, as amended in 61 FR 37818 (July 22, 1996), the Commission also gives notice of the commencement of the final phase of its

¹ The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR § 207.2(f)).

² Commissioner Crawford determines that there is a reasonable indication that an industry in the United States is materially injured by reason of the subject imports.

³ For the purposes of these investigations, cut-to-length carbon steel plate is hot-rolled iron and nonalloy steel universal mill plates (i.e., flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1,250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief), of rectangular shape, neither clad, plated, nor coated with metal, and whether or not painted, varnished, or coated with plastics or other nonmetallic substances; and certain iron and nonalloy steel flat-rolled products not in coils, of rectangular shape, hot-rolled, neither clad, plated, nor coated with metal, and whether or not painted, varnished, or coated with plastics or other nonmetallic substances, 4.75 mm or more in thickness and of a width which exceeds 150 mm and measures at least twice the thickness. Included in this definition are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (i.e., products which have been "worked after rolling")—for example, products which have been bevelled or rounded at the edges. Excluded from this definition are plates that are characterized as grade X-70 plates.

⁴ Cut-to-length carbon steel plate is currently covered by the following statistical reporting numbers of the HTS: 7208.40.3030; 7208.40.3060; 7208.51.0030; 7208.51.0045; 7208.51.0060; 7208.52.0000; 7208.53.0000; 7208.90.0000; 7210.70.3000; 7210.90.9000; 7211.13.0000; 7211.14.0030; 7211.14.0045; 7211.90.0000; 7212.40.1000; 7212.40.5000; and 7212.50.0000.
